SKILLS

Backend
C# · .NET · ASP.NET Core · EF Core · SignalR · REST APIs · Django

Frontend
Angular · TypeScript · React · HTML · CSS

Data
SQL Server (views, stored procedures, triggers) · PostgreSQL · Python

DevOps
Docker · Git · GitHub Actions · CI/CD · Kubernetes (learning now)

Security and quality
JWT and roles · rate limiting · xUnit · Vitest · SOLID

LANGUAGES

Danish · native

Turkish · native

English · fluent

CERTIFICATES

Google AI Essentials · Coursera, 2026

SOLID Programming Principles · LinkedIn Learning, 2025

Software Version Control · LinkedIn Learning, 2025

Mirsad Köse

Full-stack developer · C#/.NET and Angular · Datatekniker apprentice, programming

PROFILE

Datatekniker apprentice specialising in programming and co-founder of Vestegnens IT-løsninger. I build complete systems, from the database and API in C#/.NET to user interfaces in Angular, and ship them to real users: a real-time chat platform for TEC, production data tools at MEC APEM, and websites and ordering systems for local businesses. I take responsibility, thrive in teams and work in a structured way. My goal is DevSecOps: Docker, Kubernetes and automation with security built in. **I am looking for an apprenticeship and can start right away.**

EXPERIENCE

Co-founder and full-stack developer
2025 – now

Vestegnens IT-løsninger · self-employed

- Websites, web apps and integrations for local businesses: development, hosting, domains and technical SEO.
- vestegnensit.dk: more than 50 pages, with my own Node scripts that check links, redirects and the sitemap before every deploy.
- Kvixa: self-service kiosk and online ordering, in daily use at a restaurant in Greve (team project).
- Direct contact with customers from the first meeting to launch.

Developer, production data tools
2026

MEC APEM

- Python and Streamlit tools that turn machine and test data from an assembly line into overviews of jobs, progress and test results.
- Wrote the setup guide so staff without programming experience can run them.

Full-stack developer, school-based apprenticeship (SKP)
2024 – now

TEC, Technical Education Copenhagen · Ballerup

- Build full-stack systems in teams with C#/.NET, Angular, SQL Server, EF Core, tests and Docker.
- Work in an agile way with Git, domain models, testing, debugging and documentation.

SELECTED PROJECTS

SOPChat, real-time chat platform
Team of 4

- A Discord-style platform with servers, channels, private chats, file sharing, an admin dashboard and a curriculum quiz with 1,000 questions.
- JWT with refresh tokens, roles up to super admin and per-user rate limiting. Clean layered architecture, shipped as one Docker image.

`C# · ASP.NET Core · SignalR · Angular · EF Core · SQL Server · Docker`

TaxaPris, price calculator for a taxi company
School assignment

- Address search and route calculation from OpenStreetMap, day, evening and holiday tariffs, and six surcharges as separate classes.
- xUnit and Vitest tests, with one test locking in the company's official control price.

`.NET 8 · ASP.NET Core Web API · Angular · Signals · xUnit · Vitest`

EDUCATION

Datatekniker, specialising in programming
2024 – now

TEC, Technical Education Copenhagen · Ballerup

- H1–H3 completed, H4 in progress. Programming and OOP, databases, web and REST APIs, testing, architecture, DevOps and security.

HTX, technical upper secondary
2023 – 2024

NEXT Sydkysten Gymnasium · Ishøj

- Product development, user-centred design and Human-Computer Interaction (HCI).
